## OVERVIEW OF COMPANY & PRODUCTS

InfiniteRule Security takes pride in its commitment to manufacturing high-quality hitch locks in the United States. By sourcing materials and assembling products domestically, InfiniteRule Security ensures that its locks meet the highest standards of quality and reliability. This commitment to domestic manufacturing has several advantages for customers.

We started InfiniteRule Security because we experienced firsthand the risk of losing a high-value automotive accessory to theft. The next hurdle was realizing that when you have multiple vehicles and accessories for each that you want to secure, it is much more convenient to have a single key for multiple products.

## DISTRIBUTOR BENEFITS

**Quality Control:** InfiniteRule Security has direct oversight over the entire manufacturing process, allowing them to closely monitor quality and ensure that every lock meets their exacting standards.

**Reduced Lead Times:** Domestic manufacturing eliminates the need for long overseas shipping times, reducing lead times and ensuring that customers receive their locks promptly.

**Responsiveness to Customer Needs:** Being located in the USA allows InfiniteRule Security to quickly respond to customer feedback and market trends, enabling them to continuously improve their products and services.

## CUSTOMER BENEFITS

In addition to their commitment to **USA manufacturing**, InfiniteRule Security's keyed-alike feature provides further assurance of reliability and convenience. This feature allows customers to order multiple locks with the same key, simplifying key management and reducing the risk of lost or stolen keys.

The **keyed-alike** feature is particularly beneficial for businesses that manage fleets of trailers, such as rental companies and RV or trailer dealerships. By using keyed-alike locks, these businesses can reduce the number of keys required for their entire fleet, making it easier for employees to access and secure trailers.

**Keyed-coded** InfiniteRule Security keys have the assigned key code stamped on them, allowing customers to order additional locks keyed to the same code at any time. This convenience eliminates the need for re-keying existing locks, saving time and money. In order to take advantage of this feature a customer must call and verify that the key code is in stock and still available for production.

## VALUE PROPOSITIONS

**Manufacturer-specific** options are available for a huge variety of the towing and off-road accessory market. In addition to hitch locks we offer trailer latch locks, tow bar locks, tire carrier locks, tent mount locks for a multitude of manufacturers.

**Application-specific** products will always win in a competition of satisfaction and quality. In the world of hitch and trailer security, a one-size-fits-all approach often leads to compromised protection. InfiniteRule Security stands out by meticulously designing hitch locks tailored to the unique ball mount design and configurations of all major adjustable hitch brands. Unlike generic locks that struggle to adapt to varying ball mount sizes and shapes, InfiniteRule's application-specific locks provide a perfect fit, ensuring unmatched security and peace of mind. We also offer applications for universally sized options such as 2", 2.5", and 3" receivers these are included in the mixed packs covered in the next section.

**Mixed packs** are a unique concept in the towing lock segment that allows InfiniteRule products to appeal to a larger audience and leverage the keyed-alike feature to provide the best possible product experience for our customers. The mixed-pack combo products feature a receiver lock in addition to the hitch, shackle, or trailer lock. The availability of the InfiniteRule mixed packs makes it easy for customers to protect their hitch and other receiver mount accessories (where applicable) in a seamless purchasing experience that shares a key(s).

**Keyed-alike** InfiniteRule Security keys have the assigned key code stamped on them, allowing customers to order additional locks keyed to the same code at any time. This convenience eliminates the need for re-keying existing locks, saving time and money. In order to take advantage of this feature a customer must call and verify that the key code is in stock and still available for production.

**Made in the USA** allows us to ensure a high degree of product quality and consistency in our machining and production of products. Our state of the art equipment is working hard to produce great products each day in our Oxnard, CA. Factory.

## HOW TO CHOOSE YOUR PACK SIZE

1. Do you know what the diameter of the pin you currently have that you would like to replace with a lock?
2. What is the Span Length? (The length you need the cover between the lock and the inside end of the pins head)
3. Do you want a Keyed Alike lock for your vehicle's Receiver?
4. How many Keyed Alike locks are you wanting for your Hitch?
5. Would you like additional locks keyed the same for other vehicles?

### DOES YOUR HITCH REQUIRE A SLEEVE TO INSTALL INTO THE VEHICLE'S RECEIVER?

### WHAT IS A MIXED PACK?

A Mixed pack includes 1 lock that is shorter than the rest for your vehicle's receiver
