OVERVIEW OF COMPANY & PRODUCTS

InfiniteRule Security takes pride in its commitment to manufacturing high-quality hitch locks in the United States. By sourcing materials and assembling products domestically, InfiniteRule Security ensures that its locks meet the highest standards of quality and reliability. This commitment to domestic manufacturing has several advantages for customers.

We started InfiniteRule Security because we experienced firsthand the risk of losing a high-value automotive accessory to theft. The next hurdle was realizing that when you have multiple vehicles and accessories for each that you want to secure, it is much more convenient to have a single key for multiple products.

DISTRIBUTOR BENEFITS

Quality Control: InfiniteRule Security has direct oversight over the entire manufacturing process, allowing them to closely monitor quality and ensure that every lock meets their exacting standards.

Reduced Lead Times: Domestic manufacturing eliminates the need for long overseas shipping times, reducing lead times and ensuring that customers receive their locks promptly.

Responsiveness to Customer Needs: Being located in the USA allows InfiniteRule Security to quickly respond to customer feedback and market trends, enabling them to continuously improve their products and services.

CUSTOMER BENEFITS

In addition to their commitment to **USA manufacturing**, InfiniteRule Security's keyed-alike feature provides further assurance of reliability and convenience. This feature allows customers to order multiple locks with the same key, simplifying key management and reducing the risk of lost or stolen keys.

The **keyed-alike** feature is particularly beneficial for businesses that manage fleets of trailers, such as rental companies and RV or trailer dealerships. By using keyed-alike locks, these businesses can reduce the number of keys required for their entire fleet, making it easier for employees to access and secure trailers.

Keyed-coded InfiniteRule Security keys have the assigned key code stamped on them, allowing customers to order additional locks keyed to the same code at any time. This convenience eliminates the need for rekeying existing locks, saving time and money. In order to take advantage of this feature a customer must call and verify that the key code is in stock and still available for production.

VALUE PROPOSITIONS

Manufacturer-specific options are available for a huge variety of the towing and offroad accessory market. In addition to hitch locks we offer trailer latch locks, tow bar locks, tire carrier locks, tent mount locks for a multitude of manufacturers.

Application-specific products will always win in a competition of satisfaction and quality. In the world of hitch and trailer security, a one-size-fits-all approach often leads to compromised protection. InfiniteRule Security stands out by meticulously designing hitch locks tailored to the unique ball mount design and configurations of all major adjustable hitch brands. Unlike generic locks that struggle to adapt to varying ball mount sizes and shapes, InfiniteRule's application-specific locks provide a perfect fit, ensuring unmatched security and peace of mind. We also offer applications for universally sized options such as 2", 2.5", and 3" receivers these are included in the mixed packs covered in the next section.

Mixed packs are a unique concept in the towing lock segment that allows InfiniteRule products to appeal to a larger audience and leverage the keyed-alike feature to provide the best possible product experience for our customers. The mixed-pack combo products feature a receiver lock in addition to the hitch, shackle, or trailer lock. The availability of the InfiniteRule mixed packs makes it easy for customers to protect their hitch and other receiver mount accessories (where applicable) in a seamless purchasing experience that shares a key(s).

Keyed-alike InfiniteRule Security keys have the assigned key code stamped on them, allowing customers to order additional locks keyed to the same code at any time. This convenience eliminates the need for rekeying existing locks, saving time and money. In order to take advantage of this feature a customer must call and verify that the key code is in stock and still available for production.

Made in the USA allows us to ensure a high degree of product quality and consistency in our machining and production of products. Our state of the art equipment is working hard to produce great products each day in our Oxnard, CA. Factory.

MADE IN USA

POLICY

The manufacturer, InfiniteRule Security, hereby establishes a Minimum Advertised Price (MAP) policy for all of its products. The MAP is the lowest price that a retailer can advertise a product for. Retailers are not allowed to advertise products below the MAP in any form of media, including print, online, and in-store signage.

EXCEPTIONS

There are a few exceptions to this policy. Retailers may advertise products below the MAP in the following circumstances:

Closeouts: Retailers may advertise products below the MAP if they are closeouts. Closeouts are products that InfiniteRule is no longer going to produce.

Promotions: Retailers may advertise products below the MAP if they are participating in an InfiniteRule sponsored promotion.

ENFORCEMENT

InfiniteRule Security will monitor retailers' advertising to ensure that they are complying with this policy. Retailers who violate the policy may be subject to penalties inline with the probationary process that is defined in our wholesale pricing program.

DISCLAIMER

This MAP policy is not intended to be a substitute for legal advice. Retailers should consult with an attorney to ensure that they are complying with all applicable laws.

Do InfiniteRule Locks Require Maintenance?

Yes. It is recommended that your InfiniteRule Locks are maintained every 90 days by lubricating and cleaning. This will ensure that your lock performs as it was intended and is part of your warranty protocol. Please refer to our Cleaning section for the proper way to maintain your locks.

Where are InfiniteRule Security Locks made?

InfiniteRule Locks are machined from raw materials in Oxnard California using our own facilities and machinery. We take pride in bringing manufacturing back to the USA and are committed to producing a 100% American made product.

Is there a warranty on InfiniteRule Security locks?

We do offer a 1-year warranty on all products. However, you do need to do regular maintenance and it DOES NOT cover misuse, abuse, or accidents. (Please read our detailed WARRANTY and RETURNS POLICY)

How many keys come with my locks?

Single Packs - 2 Keys
2 Packs - 2 Keys
3 Packs - 3 Keys
4 Packs - 4 Keys

What is the difference between Hitch Locks, Receiver Locks and Locking Pins?

Hitch locks prevent unauthorized removal of the ball and accessories in the hitch. Receiver locks keep the hitch attached to the towing vehicle by locking it in the receiver. Locking pins, versatile in use, come with built-in locks and can secure various components. Together, these devices enhance towing security.

What are locking pins used for?

Locking pins are used to secure various components together, ensuring they remain attached and cannot be easily separated. They are commonly found in towing setups, machinery, and equipment, where they provide a secure connection while also offering the flexibility of quick disassembly when needed. The built-in lock mechanism prevents unauthorized removal, enhancing safety and security.

How do I choose the right size locking pin for my vehicle or equipment?

To choose the right size locking pin for your vehicle or equipment, measure the diameter of the insertion hole and the length needed to ensure a snug fit. Consider the equipment's weight and load-bearing capacity. Check the material for durability and consult the equipment's manual or experts for guidance.

Are there different types of hitch locks available?

Yes, there are various types of hitch locks available, each designed to secure different manufacturer hitches and deter theft. These locks can range from pin locks that secure the hitch accessories in place, preventing unauthorized removal, to coupler locks that prevent a trailer from being hitched to a vehicle without the key, and even receiver locks that secure the ball mount to the vehicle's receiver. The choice of hitch lock depends on the specific needs and type of trailer setup one has.

How do I install a hitch lock securely?

To securely install a hitch or receiver lock, first select the right type for your setup, such as pin, trailer coupler, or receiver locks. Refer to the manufacturer's instructions at <https://infiniterule.com/installation>. This usually involves inserting the lock through the hitch pin hole or around the coupler, and then fastening by rotating the key 3 to 4 rotations. Regularly check for wear or tampering to ensure continued security.

What materials are your locking pins made of?

They consist of a durable yet sleek design, typically made from high strength stainless steel for reliable security.

How do I maintain and care for my locking pin to ensure longevity?

To ensure the longevity of your locking pin, regularly inspect it for signs of wear, or damage. Clean it with a mild detergent and water, then dry thoroughly. Lubricate with a DRY Lock Lubricant. This gives the lock and its components additional anti-corrosion properties while lubricating the lock and not attracting dirt like other oily lubricants.

Consider applying a thin coating of white lithium grease to the pin. This will help prevent wear from metal on metal contact, along with helping prevent corrosion on your hitch. Store in a dry place and avoid exposing it to harsh chemicals or extreme conditions. Periodically check its functionality to ensure it locks and unlocks smoothly. Refer to <https://infiniterule.com/cleaning/> for additional information.

Can I get a replacement key for my hitch lock?

Yes, you can often obtain a replacement key for your receiver or hitch locks by contacting the manufacturer or the retailer where you purchased it. Ensure you have the lock's model number and the number that is stamped on the key along with any other relevant details to facilitate the process.

Are your locking pins and hitch locks resistant to rust and corrosion?

Yes, you can often obtain a replacement key for your receiver or hitch locks by contacting the manufacturer or the retailer where you purchased it. Ensure you have the lock's model number and the number that is stamped on the key along with any other relevant details to facilitate the process.

What safety precautions should I take when using locking pins?

When using InfiniteRule Security locks, choose the right size and type suitable for the load-bearing requirement. Inspect them for wear or damage before use. Ensure proper alignment, engage the locking mechanism fully, and wear gloves for protection. Regularly check and maintain pins as per manufacturer's guidelines.

How often should I check and replace my hitch lock or locking pin?

HOW TO CHOOSE YOUR PACK SIZE

1. Do you know what the diameter of the pin you currently have that you would like to replace with a lock?
2. What is the Span Length? (the length you need the cover between the lock and the inside end of the pins head)
3. Do you want a Keyed Alike lock for your vehicle's Receiver?
4. How many Keyed Alike locks are you wanting for your Hitch?
5. Would you like additional locks keyed the same for other vehicles?

DOES YOUR HITCH REQUIRE A SLEEVE TO INSTALL INTO THE VEHICLE'S RECEIVER?

WHAT IS A MIXED PACK?

A Mixed pack includes 1 lock that is shorter than the rest for your vehicle's receiver
